FLOATING DEBT REDUCED \$3,000,000,000 SINCE WAR
Cut \$300,000,000 in October—Gross Debt Jumps.

Special Dispatch to THE NEW YORK HERALD.
The gross public debt of the United States increased more than \$200,000,000 in October, putting the total above \$23,000,000,000 again as a result of funding operations and the issue of Treasury gold notes.

The floating debt, however, is being consistently reduced and the total of certificates of indebtedness outstanding has been brought down to little more than \$1,000,000,000. At the end of the war this floating indebtedness totaled \$1,201,155,656. A \$200,000,000 reduction was made last month through the retirement of tax and loan certificates from the proceeds of the Treasury note issue.

At the end of the war the gross debt was \$25,596,701,648. It is now \$23,077,733,933.

Miss Spanier has been actual head of the bakery since the death of her father last spring.

GARVAN LOSES FIGHT AGAINST ALIEN SUIT

Knox Sustains \$768,131 Complaint on Patents.

Judge Knox in the United States District Court yesterday sustained the complaints in suits brought by the Synthetic Patents Company, Inc., against Francis P. Garvan, as Alien Property Custodian; John Burke, as treasurer of the United States; and Christian Hess, Carl Duisenberg and Rudolph Mann, three citizens of Germany, to recover \$768,131 in payments made to the defendants.

Garvan and Burke had moved for a dismissal of the suits on the ground that the agreement between the plaintiff and the enemy defendants was made to pay the later amounts of money from accumulated surplus, and were, therefore, unauthorized dividends. The case must now go to trial on its merits.
